

LEASYS LAUNCHES CARCLOUD E-ENERGY, THE ELECTRIC COMPACT SUV SUBSCRIPTION

- Leasys expands the e-CarCloud brand, the subscription dedicated to electrified vehicles, with a new plan that includes three models perfect for the city as well as for out-of-town trips: the Peugeot e-2008, the Opel Mokka-e crossover and the DS3 Crossback E-Tense.
- Activable via Amazon voucher and renewable for up to 12 months, CarCloud E-ENERGY provides all the services needed to experience worry-free sustainable mobility.
- The e-CarCloud, which is already available with the Peugeot e-208, on the other hand, broadens the choice by adding the Opel Corsa-e to the package that will be called CITY E-ENERGY.

Turin, 29 July 2021

Leasys expands the family of products offered by **CarCloud**, the first car subscription in Italy, by introducing **E-ENERGY**, which combines the appetite for electric mobility and compact SUVs, with three of Italian drivers' favourite models.

The new package launched by the Company, a Stellantis brand and a subsidiary of FCA Bank, makes it possible to subscribe to **Peugeot e-2008, Opel Mokka-e and DS3 Crossback E-Tense**: three small SUVs that provide performance, comfort and respect for the environment, ideal for driving in the city and for out-of-town trips.

With the arrival of the E-ENERGY package, Leasys broadens the offering of the **e-CarCloud brand**, dedicated to the subscription of electrified vehicles, one of the most convenient and advantageous solutions for accessing the world of electric cars. Thanks to the new formula, reserved for **private customers and self-employed professionals**, customers will be able to book the car of their choice, pick it up and change it with a **48 working-hour notice** at one of the participating Leasys Mobility Stores.

Subscribing to the new CarCloud plan is very simple: just make a **one-time subscription on Amazon** at a cost of €249, convert the subscription voucher on the

site carcloud.leasys.com and reserve one of the three compact SUVs, at a price of €499 per month.

The subscription can be renewed monthly, for up to 12 months, and will have a minimum duration of 30 days, after which it can be cancelled without penalty.

CarCloud E-ENERGY also includes all the **services needed** to drive with absolute peace of mind (including third party liability [RC] insurance, Kasko and theft coverage, routine and non-routine maintenance, not to mention additional services). The cars are also **equipped with the cable** necessary to charge them through the home network. And, thanks to the **Leasys e-Mobility Card**, it will be possible to charge the vehicle at no cost at all Leasys Mobility Stores and access the network of public charging points.

In addition, the e-CarCloud, recently launched with the Peugeot e-208, is enlarging its offering to include the Opel Corsa-e but will continue to be available to customers for €399 under the name **CITY E-ENERGY**.

Leasys

Leasys, a Stellantis Brand and a subsidiary of FCA Bank, a 50:50 joint venture between Stellantis and Crédit Agricole, was established in September 2001. Leasys offers a complete and innovative system of mobility services to individuals, professionals and businesses of all sizes: from short, medium and long-term rentals to peer-to-peer car sharing via the U Go platform and I-Link. At the end of 2019, it launched the first car subscription service in Italy with CarCloud. With the Clickar brand, Leasys is also one of the leading Italian online and offline retailers of pre-owned company cars to individuals, professionals and companies. Headquartered in Italy, Leasys began a process of internationalization in 2017 by opening multiple offices throughout Europe: today the company operates in Spain, France, the United Kingdom, Germany, Belgium, the Netherlands, Portugal, Denmark and Poland, managing a fleet that will have over 400,000 vehicles by the end of 2021. In June 2019, the company launched the Leasys Mobility Stores, physical outlets with a grassroots presence across Italy. The Stores, which provide customers access to all the mobility services provided by Leasys, are now available in France as well and will open soon also in the other European countries where the company is operational. With the launch of the first totally electrified Mobility Store in Torino Caselle airport, Leasys is on track to become a key operator also for sustainable mobility. In fact, thanks to the installation of over 1,200 charging stations in all the stores, at the end of 2020, Leasys had Italy's largest private electrified network. In 2021, the electrification project will continue also in the European countries in which Leasys operates. For more information: www.leasys.com
